EDUCATION

Mathematical Grammar School

Graduated with honours

Belgrade, Serbia

Sept. 2019 – Jun 2023

University of Belgrade, School of Electrical Engineering

Software Engineering, Current GPA: 9.63

Belgrade, Serbia

Oct. 2023 – Sept. 2027

EXPERIENCE

Petnica Science Center

Junior Teaching Assistant

Oct. 2023 – Present

Valjevo, Serbia

- Creating and organizing lectures and workshops
- Mentoring Computer Science projects for high school students

Petlja, Raspetljavanje

Mentor

Nov. 2024 – Mar. 2025

Belgrade, Serbia

- Mentored 20+ elementary and high school students through weekly online sessions and project guidance
- Led group discussions, tracked progress, and provided individualized feedback on assignments

PROJECTS

Analysis of Genetic Algorithm Method for Deriving a Function Formula from a Given Graph

- Developed a Python-based system to extrapolate mathematical formulas from graphical data using binary trees and genetic algorithm
- Combined evolutionary optimization and tree-based representations to accurately derive relationships from complex datasets

Simple RISC-V Operating System

- Implemented the kernel for a simple operating system
- Functionalities included asynchronous context switching, semaphores, user threads and memory organisation
- The project was developed as part of a university course named "Operating Systems 1"

Command Line Interpreter

- Implemented a Command Line Interpreter for a subset of UNIX commands
- Implemented input/output redirection and piping
- Emphasized detailed planning and thoughtful class relationship design, highlighting principles of object-oriented architecture

NeuroEvolution of Augmenting Topologies

- Explored the NEAT algorithm and its improvements over the regular genetic algorithm
- Applied the algorithm on the simple game 'Snake', and tracked its results

OTHER

Math Tutor

Tutoring mathematically gifted students at a private school

Belgrade, Serbia

Volunteer Teacher for an Elementary School

Taught math and programming classes for elementary school students

Belgrade, Serbia

SKILLS

Skills: C, C++, Python, Git, SQL, Java, Assembly
